SOLA DATA CONNECTOR

Model

SOLA Data Connector DE	-- --
SOLA Data Connector EN	-- --

Technical details:

Item description	SOLA Data Connector

CHARACTERISTICS:

- Direct data transfer during the measurement: Thanks to the SOLA Data Connector, CITO measured values can be transferred to any desired software on Windows® computers via Bluetooth®
- Avoid errors: Immediate documentation of the measured values avoids illegible handouts and transmission errors
- Fast and precise measurements: The SOLA Data Connector allows fast and precise measurements without interrupting the measurement process
- Individual settings: The product allows individual settings for units, key assignment, comma separation and language
- Licensed for installation on 5 end devices. If you require more than 5 end devices, please contact us for a customized offer
- Free trial: A free trial version covering 10 test measurements is available for download
