DHM drill hole marker and PMB/PMR permanent markers

Precise marking with new, waterproof markers from SOLA

With the DHM drill hole marker (black) for deep hole markings and the universal PMB (black) and PMR (red) permanent markers, SOLA has added three waterproof marking pens to its range of markers. The new markers all have a waterproof, fast-drying and light-resistant ink and a practical attachment clip with roll stop. This can be conveniently clipped to the trouser or chest pocket and also prevents the annoyance of the pen rolling away when working on smooth surfaces.

DHM drill hole marker for deep hole markings

The waterproof DHM drill hole marker has a fine stainless steel tip and marks drill holes, indentations or hard-to-reach places up to a depth of 25 mm (1 inch). The bullet tip guarantees pinpoint precision markings. The black ink is waterproof and quick-drying. This makes the DHM an ideal marker pen for permanent drawing and marking on dry surfaces such as glass, metal, stone or plastic without smudging. The narrow line width of up to 1.5 mm (0.06 inch) also makes the DHM drill hole marker the ideal choice for drawing or writing.

PMB/PMR permanent markers for making your mark on everything

The black PMB and red PMR permanent markers can be used anywhere. The two water-resistant marker pens write reliably on almost any surface, including glass, metal, wood, plastic, cardboard, electrical cables or labels. Thanks to line widths of between 1.5 mm and 3 mm (0.06 and 0.12 inch), the PMB/PMR permanent markers also create markings that are easy to read. The pressure-resistant bullet tips are able to withstand even the strongest pressure without becoming damaged. The ink dries within a matter of seconds and is smudge-proof, making the pens perfect for left-handers too.

The new waterproof DHM and PMB/PMR markers are the first ink-based marker pens in SOLA's product range. They make a practical addition to the existing selection of pencils for various applications and the popular TLM2 deep hole marker with HB graphite lead for markings up to 45 mm (1.77 inches) deep.

About SOLA-Messwerkzeuge GmbH:

Since 1949 the SOLA brand has meant high precision measuring and marking tools. As market leader in premium spirit levels, the Austrian company manufactures a wide range of products, including screeding levels, folding rules, long and short tapes, squares, measuring wheels, marking products, laser distance meters and a customized laser program. SOLA's approach is to develop and continuously optimize its products to match its customers' requirements as closely as possible. SOLA Measuring Tools are sold in 70 countries around the world. 75% of all products are manufactured in Götzis, Austria, where the headquarters and production facility are located. This is where 200 employees develop, produce and distribute a product range of more than 1,500 products. The high quality standards that SOLA has set for itself are subjected to constant control in the company's own laboratories and testing facilities. Find out more at www.sola.at
