LASER DISTANCE METER VECTOR 20

THE LATEST MEMBER OF THE VECTOR FAMILY: THE VECTOR 20

Joining SOLA's popular and well-established VECTOR 40 and VECTOR 80 laser distance meters is the newest member of the VECTOR family, the VECTOR 20. The VECTOR 20 can be used for length measurement and continuous measurement. It has been specially developed for day-to-day use, when you need measurements fast. In addition, no prior experience with laser distance meters is required.

For quick and easy use

The VECTOR 20 can measure distances between two points of up to 20 metres. The shortest range it can measure is 0.2 mm. Distances can be measured accurately and conveniently in just a few seconds. Continuous measurement is also possible.

Practical and straightforward

A clearly legible display makes operation simple. The large buttons mean it can also be easily operated while wearing gloves.

Learning to use the device is easy and operator errors are all but eliminated. The VECTOR 20 is self-explanatory – the measurement functions are available as soon as the device is switched on.

Reliable use

The VECTOR 20 is powered by three 1.5 volt AAA batteries. This allows it to carry out up to 5000 measurements.

The SOLA brand stands for perfect measuring tools. As experts in measuring and marking, we have manufactured a wide range of products for more than 60 years, providing tradespeople with the support they need on the construction site. Our approach is to continually develop and optimise our products so that they best meet our customers' needs.

Product innovations from the SOLA brand are characterised by consistent simplicity, efficiency and precision. They have enabled us to set standards in a wide range of applications for many years, from civil engineering to interior construction. As the Austrian market leader for premium spirit levels, we offer an extensive range of products, including metre rules, screeding levels, tapes, squares, marking products, laser distance meters and a customised laser programme.
