

SOLA Pencils

Accurate, Reliable, Robust.

**It's just a pencil.
But it's a great pencil.**

On tile/ceramic, metal, stone, or even wet wood – SOLA pencils write reliably. This is mainly due to the specific composition of materials in the lead, such as clay, graphite, and wax.

All SOLA pencils are made of high-quality lime wood, which makes the pencils very robust, however, sharpening with a cutter or sharpener is still easy.

The pencils are finished by applying three-fold high-quality lacquers. They are also environmentally friendly and free from toxic heavy metals.

Highlights

- Robust due to resilient lime wood casing
- High percentage of graphite for optimum writing performance
- Proven lead mixture ratios for special surfaces

Pencil types and applications
