

METRON 20

Laser distance meter

The most important functions in a compact device.

The compact METRON 20 is the ideal companion for quick, uncomplicated measurements. This extremely user-friendly laser distance meter is suitable for distances of up to 20 m and has an accuracy of ± 2 mm. The device offers all the important functions: length, area, volume and continuous measurements.

Highlights

- Range 0.05 to 20 m
- 4 measurement functions: length, area, volume and continuous measurements
- Easy operation for the fastest measurement results
- 1-line illuminated display with large display for quick reading

- Integrated horizontal vial for pinpoint measurements
- Soft grip and ergonomic design
- Automatic switch-off
- Compact, lightweight, handy

The METRON 20 has an integrated small vial for the exact horizontal alignment of the laser. This enables pinpoint measurements, thereby providing extremely precise results.

Order information METRON 20
(Item no. 71024501)

Delivery contents

- METRON 20 laser distance meter
- 2 x 1.5 V (AAA) batteries
- Belt pouch
- Strap
- Quick starter

Technical Data

Measuring range	0.05 - 20 m*
Accuracy	±2.0 mm**
Unit of measure	m
Laser class	2
Laser type	635 nm < 1 mW
Automatic power off, laser	20 s
Automatic power off, device	150 s
Protection class	IP42
Operating time	< 5000 measurements***
Power supply	2 x 1.5 V (AAA) batteries
Operating temperature	0 to 40 °C
Storage temperature	-20 to 60 °C
Dimensions (H x W x D)	105 x 47 x 27 mm
Weight with batteries	103 g

* Depending on conditions at work site.
 ** Accurate from 0.05 – 10 m. The maximum tolerance of 0.1 mm/m may deteriorate at distances between 10 m and 20 m.
 *** Use at room temperature.

Functions

- Length measurement
- Area measurement
- Volume measurement
- Continuous measurement
