

WMD 200, WMD 500

Digital angle finder

The digital angle finder, to quickly and precisely measure angles.

The WMD 200 or WMD 500 digital angle finder combines the functions of a digital protractor and a ruler in a single electronic tool. The WMD allows measuring, transferring and drawing internal and external angles. The digital LCD display makes reading the measured value much easier, and guarantees precise results with an accuracy of $\pm 0.3^\circ$.

Highlights

- It measures external and internal angles quickly and precisely with an accuracy of $\pm 0.3^\circ$
- Locking screw for fixing the legs
- Base leg with stop edge for comfort of use
- Robust, dimensionally stable legs with reinforcement ribs
- LCD display for the user-friendly reading of the measured value
- Hold function to enable "freezing" the current measured value
- Zero function to zero the measured value
- Metric, high-contrast scaling on both legs for good readability
- Child-proof battery compartment (IEC 62368-1:2018)
- Handy. Lightweight. Robust.

The WMD digital angle finder can be used to measure, transfer and draw both internal and external angles.

Stop edge for stability and accuracy when measuring and marking angles

Model	Item no.	Technical Data	
WMD 200	56052301	Material	Aluminum
WMD 500	56052401	Surface	anodized
		Color	black
		Measuring range	270°
		Measuring tolerance	±0.3°
		Graduations	mm/cm, 2-piece, lasered on both sides
		Scale grid	1.0 mm
		Power supply	Button cell CR2032
